Sufficiency Timeline

In **October 2023** we assessed supply and demand across the Bradford District

- To assess supply of 2 years old childcare we collected capacity data from providers
- To assess demand of 2 years old childcare we used established 30hr codes for 3&4 years old as a percentage of the 3&4 years old cohort.

In **December 2023** we launched our 2 years old vacancy survey. At ward level, this highlighted areas which required more detailed analysis due to potential shortfall of places.

After detailed analysis of shortfall hotspots in **January 2024** we were able to come to sufficiency outcome for April 2024.

Sufficiency Timeline

For April 2024 we expect demand for childcare to increase **BUT** we predict that **the existing supply of childcare will meet this demand.**

Programme Delivery Funding

- The funding is for use across both programmes

- There is no revenue start-up funding for the working families entitlement expansion programme
