

Transforming Prevention and Early Help

Supporting families and communities for the future

Developing our Family Hubs together In Bradford

Our Purpose

These events are to bring together representatives from local groups and organisations to help us find what local support for families exists within the Family Hub areas. We want to know what is important and is valued by families and communities.

- How do people already support each other and help each other in this area?
- Who is presently delivering services and offering support which contribute to the Family Hub offer?
- What is it like to live in this area and how what are the important things for us to work together on?
- Who else can help us as we develop our new Family Hubs?

Events are being held across the District, to find out more information, please see overleaf.
