Draft version June 2017 due for revision June 2019

Speech and Language Therapy Service

Drop In Service for
Children Under 6 Years

Are you worried about your child's
speech or language development?

Need help and advice?

No appointment is necessary -
just call in.

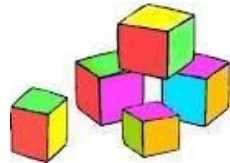

Why go to a drop in clinic?

If you are worried about your child's speech and language development you can visit a drop in session.

The sessions are run by speech and language therapists who will chat through any concerns that you may have.

Supporting your child's speech and language development is one of the most important things you can do.

What to expect at the drop in session

- The drop in is an open session where other children and parents may be present.
- You will spend about fifteen minutes with a therapist, who will ask you questions about your child's general development.
- We will assess your child's individual needs through observation, play and discussion.
- You may have to wait a short time if the session is busy, but this will give us the opportunity to observe your child interacting with others.

After your drop-in session?

After the drop in session you may

- Be given reassurance that your child's speech and language skills are developing appropriately.
- Be asked to attend a future drop in so that we can review your child's progress.
- Be given an appointment for further assessment with a local speech and language therapist.

You will be given advice, support and information on how best to help your child with their speech and language development.
