### Forecast methodology for South West 4

The need for primary school places depends on the local child population. Key factors in the forecast are the number of births and children registered with the Health Authority in an area, migration in and around the District and movement of families into new housing developments.

The take up rate of 90% is applied to the health data and the table below shows the calculated number of Reception places required for North West 4 residents in the coming years.

Year of reception intake	2023	2024	2025	2026	2027
Calculated places required	443	423	387	399	389

In addition to these figures, forecasts incorporate trends for children attending schools outside of their local planning area. For South West 4, the highest number of children coming in have been from South West 3; the highest number attending elsewhere have gone to schools in South West 3 and South West 5. Historically, very few children have attended schools here from outside of the District.

## Forecasts and historic accuracy for South West 4

The tables below contain forecast data submitted to the DfE as part of the annual School Capacity (SCAP) return. The grey column shows the difference between last year's forecast and the actual number of pupils on roll at the schools at the January school census.

### Reception:

Year	2022	2023	2024	2025	2026	2027

### Reception to Year 6:

Year	2022	2023	2024	2025	2026	2027
Total Capacity	5181	5181	5181	5181	5181	5181
<b>Forecast</b>	<b>4748</b>	<b>4860</b>	<b>4810</b>	<b>4684</b>	<b>4599</b>	<b>4515</b>
Surplus	433	321	371	497	582	666
% Surplus	9.1%	6.6%	7.7%	10.6%	12.7%	14.8%
<b>Actual</b>	<b>4880</b>	-	-	-	-	-
Difference	132	-	-	-	-	-
% Difference	2.8%	-	-	-	-	-

Note that a PAN reduction alone does not change the net capacity of the school. Total Capacity, as calculated above, factors in PAN but is predominantly concerned with the capacity of the buildings; net capacity can therefore only be adjusted as a result of significant changes to the building and / or use of space. The total capacity here is therefore the maximum number of potential school places that can be physically accommodated; however, the maximum number of pupils that can be accommodated in any year will be dependent on factors such as the PAN, the class organisation and the number of teaching staff at the school.

### Planned/possible actions

Forecasts for this planning area show a significant level of surplus places.

Following consultation, All Saints C of E Primary School will reduce their PAN from 90 to 60 from September 2024.

The Local Authority will continue to monitor the numbers in health data and the impact of this planned PAN reduction whilst working collaboratively with schools and trusts and providing the required information to assist the decision-making process.
