Forecast methodology for Bingley Keighley

The need for primary school places depends on the local child population. Key factors in the forecast are the number of births and children registered with the Health Authority in an area, migration in and around the District and movement of families into new housing developments.

The take up rate of 96% is applied to the health data and the table below shows the calculated number of Reception places required for Bingley Keighley residents in the coming years.

Year of reception intake	2022	2023	2024	2025	2026
Calculated places required	92	106	84	93	93

In addition to these figures, forecasts incorporate trends for children attending schools outside of their local planning area. For Bingley Keighley, the highest number of children coming in are from Keighley 1; the highest number attending elsewhere go to schools in Bingley 1. Historically, children attending schools here from outside of the District have not been a factor in the forecast for this area.
