### Forecast methodology for Shipley 1

The need for primary school places depends on the local child population. Key factors in the forecast are the number of births and children registered with the Health Authority in an area, migration in and around the District and movement of families into new housing developments.

The take up rate of 95% is applied to the health data and the table below shows the calculated number of Reception places required for Shipley 1 residents in the coming years.

Year of reception intake	2022	2023	2024	2025	2026
Calculated places required	166	171	152	151	140

In addition to these figures, forecasts incorporate trends for children attending schools outside of their local planning area. For Shipley 1, the highest number of children coming in have been from North East 1; the highest number attending elsewhere have gone to schools in North East 2. Historically, children attending schools here from outside of the District have not been a factor in the forecast for this area.

## Forecasts and historic accuracy for Shipley 1

The tables below contain forecast data submitted to the DfE as part of the annual Schools Capacity (SCAP) return. The grey column shows the comparison (accuracy) of last year's forecast with the (actual) number of pupils on roll at the schools at the January school census.

### Reception to Year 6:

Year	2021	2022	2023	2024	2025	2026
Total Capacity	1220	1220	1220	1220	1220	1220
<b>Forecast</b>	<b>1070</b>	<b>1064</b>	<b>1045</b>	<b>1021</b>	<b>1016</b>	<b>977</b>
Surplus	150	156	175	199	204	243
% Surplus	12.3%	12.8%	14.3%	16.3%	16.7%	19.9%
<b>Actual</b>	<b>1078</b>	-	-	-	-	-
Difference	-8	-	-	-	-	-
Accuracy	99.3%	-	-	-	-	-

Note that a PAN decrease does not automatically affect the net capacity of the school. Total Capacity, as calculated above, is based on the capacity of the buildings and will only be amended if significant changes are made to the use of space. Capacity here is therefore the maximum number of potential school places; however, the maximum deliverable places in any year will be dependent on factors such as the number of classes schools are staffed to teach.

### Planned / possible action

The Local Authority will continue to monitor the number of children and parental preference in this planning area.

Whilst surplus places are forecast for this planning area, this is largely due to the area being a net exporter of children to other planning areas. The Health data for this area is more closely aligned with the combined PAN of the schools here. To protect against an increase in local children requesting places in their 'home' planning area, there are currently no plans to address the surplus here for 2024 but this will continue to be closely monitored.
