

GCSE Chemistry - Increasing Confidence to Deliver Challenging Content

Identify the key issues arising from the new curriculum and consider how to audit and adapt existing schemes of learning to accommodate the changes.

Summary

This course will support science teachers in implementing the latest curriculum and tackle any issues that may arise. You will also consider how to audit and adapt existing schemes of learning to accommodate the changes.

Outcomes and Details

You will be able to:

- ▶ Describe key issues arising from changes to the curriculum and their implications
- ▶ Plan and evaluate ways of embedding the new curriculum in schemes of learning

Delivered in collaboration with Northern Lights - a Science Learning Partnership.

Don't miss out on the latest news from the National STEM Learning Centre and Network - sign up to receive email updates at: <https://www.stem.org.uk/user/register?destination=home>

Northern Lights Science Learning Partnership is a partnership between Northern Lights Teaching School Alliance and STEM Learning.

We are the Science Learning Partnership for North Western Yorkshire and York covering the areas of Craven, Selby, Harrogate, Richmondshire, Hambleton, Bradford and York

STEM Learning is the largest UK provider of subject-specific CPD for teachers and technicians.

The Science Learning Partnerships (SLPs) combine local expertise in teaching and learning in science, facilitating CPD, and providing school-to-school support.

Northern Lights Science Learning Partnership can provide your school with high quality Science CPD which can be tailored to meet your needs.

We can offer:

- ▶ For both primary and secondary
- ▶ CPD delivered within schools or clusters of schools
- ▶ One to one support for Science subject leaders
- ▶ Support for your Science department or teachers to move to good or outstanding
- ▶ Support for teachers of Science at every stage of their career
- ▶ Professional development for outstanding practitioners in local delivery of CPD
