PRIMARY AND SECONDARY

In the morning

- You can't afford to miss Matthew Newberry, HMI for Science talking about both the new framework and what OFSTED looks at when visiting both primary and secondary schools. Don't miss out on this opportunity to find out their latest thoughts, findings, and how to make the most of an inspection.
- Hear from our engaging keynote speaker, Ruth Amos, about how to actively encourage young people into STEM and the story behind her success.
- Discover how STEM Ambassadors can be used to develop an interest in STEM careers and how to access this valuable and free resource.

SECONDARY

In the afternoon

- Discover the key messages from the two main exam boards (AQA and Edexcel) about their findings from the summer exams - what top tips do you need to take back to ensure improved student outcomes? Find out how comparable outcomes work at GCSE and especially in setting the grade boundaries during the first years of a new specification.
- Also speaking will be Matt Cornock, Online CPD Coordinator from the National STEM Learning Centre. Working with experienced teachers and leading academics to develop high-quality, online courses for teacher professional development.
