

Secondary School Linking goes digital!

During 2020-21 our linking programme will provide students with the opportunity to work with another school in order to:

- Engage in dialogue about issues that really matter to students
- Explore their values and bring these to life through participating in a social action
- Appreciate the importance of identity, empathy and diversity
- Understand how we form beliefs and views about other people and how we can change our minds
- Develop critical thinking skills and share these with other students.

Our aim is to ensure that this programme will be flexible and easy as possible for teachers to follow, whilst still being an exciting and rewarding experience for students.

The Linking Network and its team of experienced advisors can fully support your school **free of charge** in ensuring this program has positive outcomes.

If you would like further information, please email:

secondary@thelinkingnetwork.org.uk

Through digital linking, pupils can explore issues... For example: anti-racism, combatting hate crime, curriculum review, awareness of fake news and anti-rumour work, caring for the environment, the dangers of stereotyping and much more...
Get in touch to find out how your school can get involved!
